Signaturit **guarantees the legal security of general daily processes** in the digital economy, such as: **remote signatures** on any document in a secure and legally binding way (eSignature); **certified delivery** of a document by email or SMS (eDelivery); and **identity validation** by authenticating identity documents (eID).

Regarding electronic signatures, **Signaturit offers the complete range that currently exists, from the lowest to the highest level of security:** simple electronic signature, advanced signature with biometrics, advanced signature with a digital certificate, and qualified signature.

In providing all these services, **Signaturit strictly complies with current, relevant European legislation** - (EU) Regulation N^o. 910/2014 - as well as with the laws of the United States that regulate this type of electronic services - eSIGN Act and UETA.

In just seven years, **Signaturit has achieved a portfolio of more than 2,500 clients spread out over 40 countries**, including companies such as EY, Acciona, Gartner, eDreams, Mediapro, and the DAS and AXA insurance companies, as well as leading companies in the financial, real estate, health, legal, and human resources sectors.

In 2019, the company closed its **first A-series round worth €7 million**, which was attended by the French private equity company 360 Capital, Bonsai Partners, Banco Sabadell, Faraday Venture Partners, Nero Ventures, and Bbooster Ventures.

Its previous round, signed in 2017 for €2.8 million, included the participation of Sabadell Venture Capital (Banco Sabadell), Nero Ventures, Faraday Venture Partners, and several investors integrated into the ESADE BAN network - including Boyser family office, for example.

In 2020, the US investment fund, Providence Strategic Growth Europe, signed a majority investment in Signaturit, with the aim of fueling Signaturit's continued growth and accelerating European expansion.

With innovation as a fundamental part of its value proposition, **Signaturit is committed to working to offer the most cutting-edge service in the sector**. That is why it has an R&D team that develops its own technologies, such as machine learning, investigating their possible applications in different industries.

It should be noted that **Signaturit is one of only two Spanish technology companies that has received funds from the European Horizon 2020 programme** for companies with high innovative potential.

Our spokespersons

Juan Zamora

CEO and co-founder

He is a Computer Science graduate from the Open University of Catalonia. He also has a Master's degree in App design from the Polytechnic University of Catalonia. Prior to the launch of Signaturit, he worked for more than 7 years as a financial sector analyst, holding Product Manager positions in entities like BBVA and Banco Sabadell. His first entrepreneurial project was MeritsApp, a family social network, and in 2013, he founded Signaturit along with Javier Martínez, the current CTO and other co-founder of the company.

Javier Martínez

CTO and co-founder

Javier Martínez is passionate about technology. He is a veteran programmer and systems administrator. He has worked for more than 10 years in various companies, like the Bayer pharmaceutical group, and for different startups, including Baikal and TribalOS. In 2013, he decided to launch Signaturit along with Juan Zamora (CEO), whom he met at Incubio.

Pau Mestre

Head of Legal & Compliance Department

Pau Mestre is a lawyer who specializes in new technologies and data protection. He graduated in criminology and criminal policy. Before working at Signaturit, he worked at KPMG Spain in the field of procedural and bankruptcy law as Project Manager, as a Legal Advisor at the startup, Aboutit, and in the field of Data Protection and New Technologies at the law firm, Land&Law Abogados.
